

Elevating Data-Driven Decision Making in Jotun

How Jotun is Enhancing Data-Driven Decision-Making with Comprehensive Training from Kubicle

The Challenge

Jotun, a global paint manufacturing company, recognized a pressing need to elevate their data literacy to maintain their competitive edge in a rapidly evolving market. Despite having advanced tools and software in place, the company faced challenges in ensuring that all employees could effectively read, interpret, and utilize data for decision-making. The primary goal was to enhance the workforce's capability in data tools like Power BI and RPA to improve operational efficiency and product quality.

Jotun Background

Jotun is a renowned paint manufacturer serving both end consumers and B2B markets with high-quality paint products. Committed to producing the best quality paint in the market, Jotun operates on a global scale, focusing on innovation and excellence in every aspect of their business. To support their mission, Jotun needed a partner that could provide flexible and relevant training to upskill their employees in data literacy.

 **10,300+ Employees**

 **Founded: 1926**

 **60+ Locations**

The Solution

After an extensive search, Jotun selected Kubicle as their training partner due to its flexibility and ability to customize learning paths. An initial cohort of employees are taking part in this learning project with plans to expand throughout the business.

Kubicle has provided tailored learning modules in data literacy, Power BI, and RPA, enabling these employees to learn at their own pace through a combination of self-paced e-learning and in-house workshops.

Kubicle's platform has offered high-quality, practical training materials that have allowed learners to apply new skills in their roles immediately. The training is structured to ensure relevance and engagement, incorporating Jotun's company values and operational needs.

“The main impact of Kubicle in Jotun is that it provides high-quality training material, ready at our fingertips at any time. This ensures that all our learners have access to the best training available throughout the year, allowing us to focus on creating effective learning paths that support our various profiles within the company.”

The Impact

Implementing Kubicle's training program to a cohort of employees has initially resulted in significant improvements across Jotun's operations. Early success stories include employees gaining new skills and taking on new responsibilities, which they were previously unable to handle.

Increased Use of Data Tools

An increase in the use of data tools like Power BI led to more data-driven decisions

Improved Operational Efficiency

Operational efficiency improved through better data monitoring and process optimization.

Enhanced Employee Engagement

Employee engagement and motivation were enhanced through relevant and flexible training paths.

Increased Employee Capabilities

Employees became more capable of creating insightful reports and analyses.

Jotun's budding partnership with Kubicle is proving to be instrumental in their journey towards enhanced data literacy and operational excellence. By providing tailored, high-quality training, Kubicle has enabled Jotun to upskill their employees, improve efficiency, and maintain their commitment to producing the highest quality paint products. With plans to expand this training project throughout the organisation, this strategic investment in employee development has reinforced Jotun's position as a leader in the paint manufacturing industry.
